Pouch Opening, Filling & Sealing Machine

Our semi-automatic pouch opening, filling and sealing machine is designed for small to medium sized food manufacturers. Requiring just a single operator, our rotary indexing machine accurately deposits hot or cold wet foods and liquid products into stand-up plastic pouches (doy packs) and seals the packs with an integrated heat sealing unit.

- Suitable for small to medium scale food manufacturers
- Open, fill and seal stand-up plastic pouches
- Suitable for depositing products such as Soup, Sauces, Stocks, Condiments, Baby Food, Stews, Pastes, Gravies, Pesto, Purees and Mashed Potato
- Semi-automatic
- Rotary indexing filling table
- Foot pedal supplied
- Requires only a single operator
- Open, fill and seal rate of approximately 10 - 15 packs per minute
- Suitable for 25ml - 250ml pouches, other fill sizes are available upon request
- High quality, robust construction using 316 food grade stainless steel
- Fully mobile with lockable castors
- Products can be fed to the machine via an incorporated hopper or connected directly to an IBC, holding tank or cooking vessel
- Operator friendly
- Hygienic, easy to clean, quick to strip down, simple to maintain
- Available for outright purchase, short or long term hire
- Comprehensive guarantee and full after sales support
- Requires compressed air supply plus 240V single phase electrics

Bag Filling & Clipping Machines

We manufacture a range of semi-automatic bag filling machines with an incorporated clipper. Ideally suited for small to medium scale food manufacturers, these filling machines are designed for depositing hot or cold food products, liquids, semi-liquids and suspended solids into a wide range of plastic bags.

Large Bag Filling Machines

We manufacture standard or bespoke, semi-automatic bag opening, filling and sealing machines. Ideally suited to small to medium sized food manufacturers, these filling machines are designed for depositing hot or cold food products, liquids, semi-liquids and suspended solids into large plastic bags or sacks and supplied with an incorporated heat sealing system.

- Semi-automatic
- Only a single operator required
- Open, fill and seal large plastic bags or sacks
- Robust, high quality construction using 316 food grade stainless steel
- Suitable for depositing hot or cold liquids, semi-liquids, suspended solids
- "Single" deposit range of 3ml - 5000ml
- Operator friendly
- Hygienic, easy to clean, quick to strip down, simple to maintain
- Comprehensive guarantee and full after sales support
- Requires compressed air supply

Vertical Form, Fill & Seal Depositors

We design and manufacture standard or bespoke, automatic depositors / filling machines to be used in conjunction with Vertical Form Fill and Seal Machines (V.F.F.S.). Each machine in this range is built to suit the exact production needs of the food manufacturer and designed for depositing food & liquid products into a wide variety of plastic pouches or bags.

Multi-Head Thermo Form Depositors

We manufacture automatic, multi-head depositors / filling machines designed specifically for dosing a wide variety of food and liquid products into high speed thermo-form conveyors. Each machine in this range is designed and built to suit the specific needs of the food manufacturer.

- Standard or bespoke design
- Fully automatic
- High quality, robust construction using 316 food grade stainless steel
- Single or multi-head depositing
- Operator friendly
- Hygienic, easy to clean, simple to maintain
- Ideal for depositing hot or cold liquid, semi-liquids, suspended solids
- Comprehensive guarantee and full after sales support
